Prairie, Oaks, and People | An investment strategy

Pacific Northwest Oak Alliance | Cascadia Prairie-Oak Partnership | PACIFIC BIRDS HABITAT JOINT VENTURE

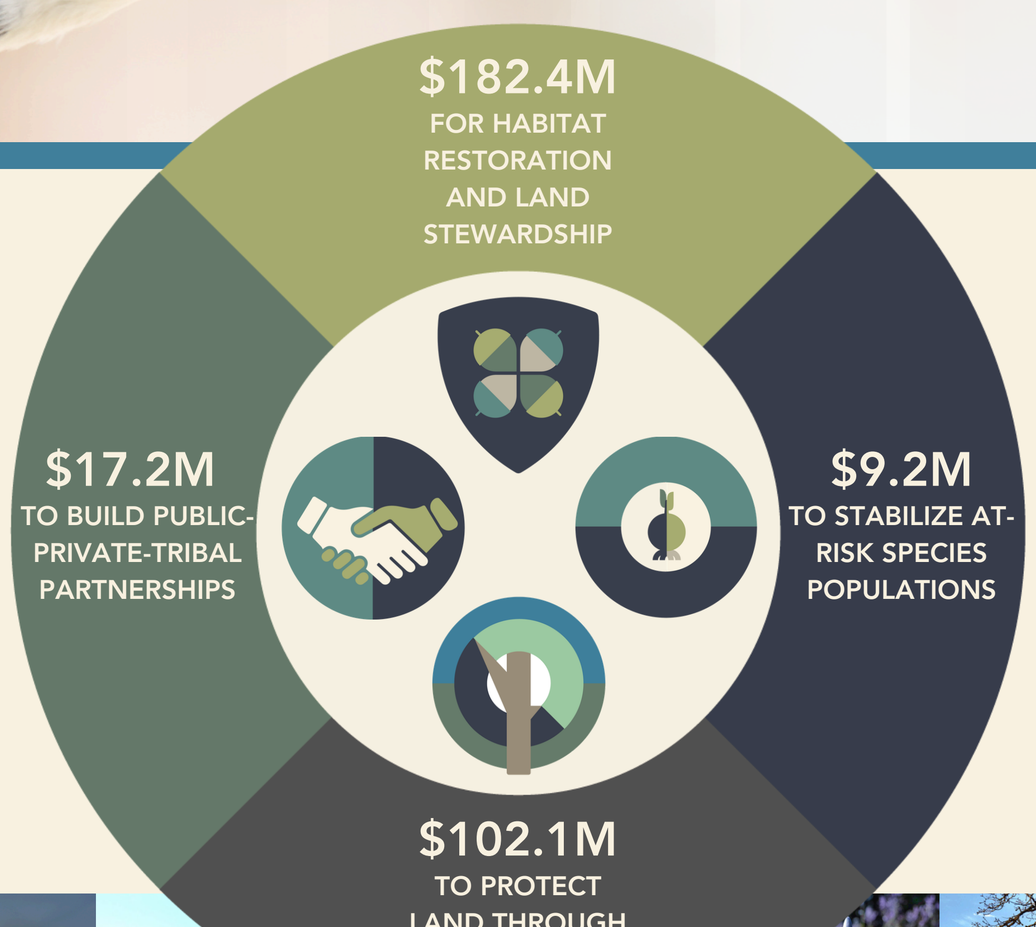

Oak and prairie ecosystems shape how people in the Pacific Northwest live, farm, and recreate, and they are among the most effective at reducing wildlife risk. Oaks take a century or more to regrow once lost, so restoring what remains cannot wait. We are working to build ecosystem and community resilience, reconnect people to oak and prairie, and integrate and advance Tribal and First Nations priorities.

RESTORE 60,000 ACRES

PROTECT 10,200 ACRES

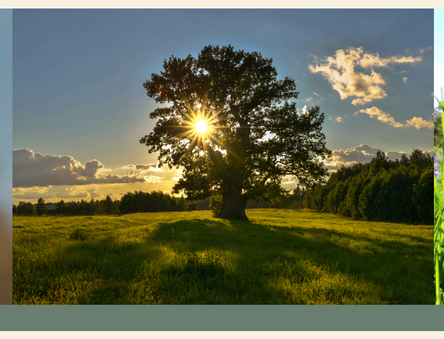

IN 5 YEARS

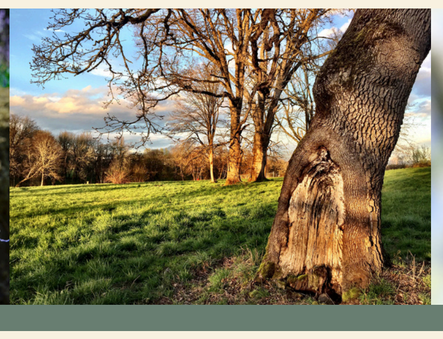

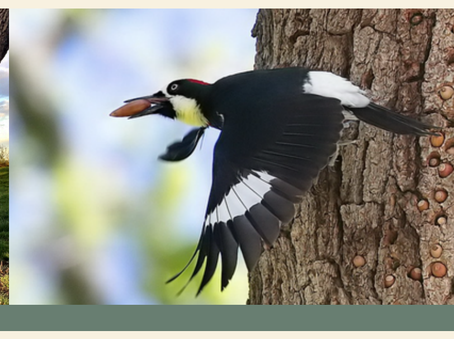

IN 10 YEARS

STABILIZE 23 SPECIES

REACH +5,000 LANDOWNERS

Partnerships are the backbone to this strategy and the mechanism to get work done.

- WHITE OAK REGION
- BLACK OAK REGION
- BOTH WHITE OAK & BLACK OAK REGIONS

Together, these regional partnerships are catalyzing proactive, voluntary and community-led oak and prairie conservation across the Pacific Northwest.

By the Numbers

Tremendous progress has been made, but there is still work to do.

46 SPECIES THREATENED OR ENDANGERED

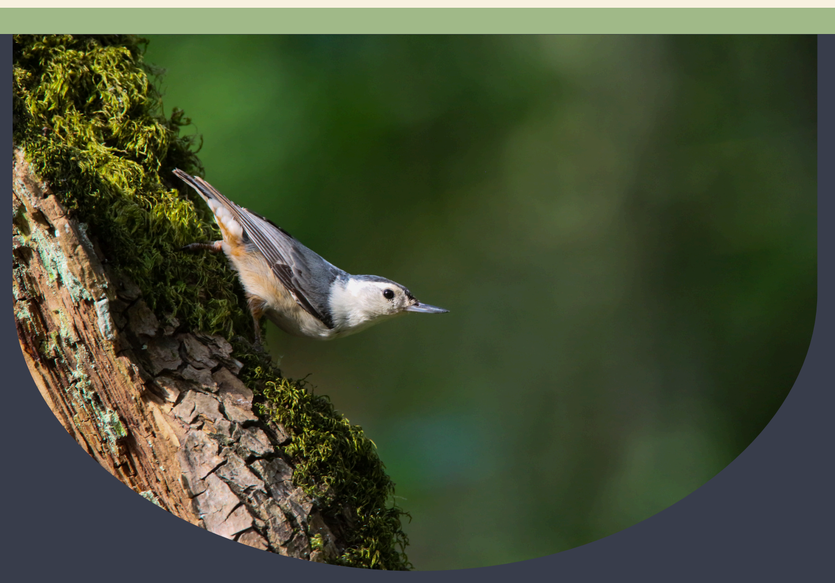

46 oak and prairie-associated species listed as Threatened or Endangered at the Federal, State, or Provincial levels

23 priority species are extirpated or near extirpated from at least one ecoregion in their historic ranges

23 EXTIRPATED SPECIES

>50 VULNERABLE SPECIES

50 other species are at risk of decline to levels qualifying for listing as Threatened or Endangered

See where your investment fits. Find opportunities to take action for oak and prairie.
